

# Manage quotes and submit to in-appetite markets directly from within Applied Epic.

**Applied Epic, the fastest growing cloud-based agency management system in the world, delivers essential capabilities for you to quote commercial lines policies directly within the application, reducing time spent switching between multiple, disparate systems.**

Small commercial quoting is an essential task for any P&C agent so it should be integrated within your management system like the rest of your daily workflows. Epic Quotes for commercial lines is the industry's first integrated small commercial quoting application to connect to the IVANS Distribution Platform. By enabling agents to flow structured data, find and select in-appetite markets, and quote multiple insurers or MGAs in a single workflow, agents create a simpler, more connected commercial lines quoting experience that improves productivity and speed to market.

**Switching between multiple, disparate systems can reduce staff productivity by as much as 30%.**

## Enables your brokerage to

- Streamline operations with an integrated quoting workflow directly within the agency management system
- Provide customers with the best coverage through more access to markets
- Decrease quote-to-bind ratio with fast and full service

## Epic Quotes for commercial lines provides your agency with:

- Snapshot of commercial coverage options to provide clients guidance on the right product and premium
- Automated flow of structured data through the quoting workflow or bridging to insurer panels
- A history of client quote details to maintain a complete prospect and client view
- Ability to fully remarket existing policies from within the management system
- A wide range of markets with automated appetite communications supported by IVANS
